

**“AN IMAGE IS
ONLY AS GOOD
AS THE TIME IT IS
TAKEN...”**

For confirming Nasogastric Tube (NGT) Tip position:

Use the First line test method pH testing

Or

**Use DoubleCHEK™ if you have been trained to use
this in your clinical area.**

For further information refer to Humber Health Partnership joint policy
CP298 Insertion, care and management of Naso/Oro-Gastric tubes in
Adults, Children and Infants available on Bridget.
